CLOUD TELEPHONY

Cloud Telephony is the technology that moves your business phone system to the cloud. It is a voice and messaging service that replaces the need for the conventional business telephone system say– PBX, EPBAX, etc. The scenario for cloud telephony India is changing fast, which entails more engagements for your business. We offer the same and provide an IVR, call center setup, call recording etc. Using Cloud telephony for your business allows you to make and receive multiple calls & SMSes simultaneously, without having to invest in any additional infrastructure. Services like IVR, Call Recording, Bulk SMS, event-based calling, etc. are only some of the many features cloud telephony has to offer. In simple words, cloud telephony is the smartest way for you to manage business calls without compromising on quality and cost.

Toll-Free Numbers - We provide, International and domestic Toll-free numbers to get your business reachable to everyone.

Virtual Mobile Numbers - Get a common virtual phone number for all your businesses to make it easier for the clients.

Missed Call services - Get the best out of our innovative missed call services which can turn your fortunes by converting customers into leads.

Call center setup (Call management Systems) - Get inbound and outbound call center services with our call management systems to empower your business.

TELECOM

Telecommunications is the technology that connects everyone across the globe. The role of telecom has changed the outlook of the marketing and advertising industry in the 21st century. But still there are few challenges in using telecom effectively to draw the customer base in your favour. Our services ensure the highest possible accuracy in fulfilling your
